How to Measure

Always measure over undergarments. Pull the tape measure so it is snug.

If your measurements fall between two sizes, consider the largest measurements first, as well as the style you're ordering, then determine which measurements would be easier to alter. Remember, it's usually easier to take in the garment than to let it out when altering.

Typically, bridal apparel is made on a smaller size chart than ready to wear garments. It is not unusual to order one or two sizes larger than your normal dress size.

Maternity sizes are available for certain styles, please call to discuss sizing.

If you are certain of the size you would like ordered please mark it on the ORDER SIZE box and initial.

If you are uncertain what size to order you can leave the ORDER SIZE box blank and we can help you to determine what size to order.

Once the gown is ordered you CANNOT change sizes or return the garment. Alteration services are available for an additional fee.

BUST – Measure around the fullest part of the bust, keeping the tape measure parallel to the floor.

WAIST – Measure the natural waistline, pulling tape measure snug.

HIP – Measure 8 - 9" below the waist at the fullest part of hip.

HEIGHT – Extra length is usually needed for 5'8" and taller.

BRA CUP SIZE – Typically D cups or larger require ordering a larger size dress to accommodate the bust, even though the measurement may indicate ordering smaller size.
